

## ACKNOWLEDGEMENT

We have been bestowed the privilege of expressing my gratitude to everyone who helped us in completing the disertation work.

We would like to express our sincere thanks to **Mr. Shankar Setty**, Information Science and Engineering, BVBCET, Hubli, for providing us an opportunity to carry out our project work.

We would like to thank **Mr. Nitin Kulkarni**, Senior Professor, BVB-MBA, for his constant guidance and never-give-up attitude towards our project.

We would also like to express our sincere thanks to **Dr.Meena S. M**, Head of Department, Information Science and Engineering department, BVBCET, Hubli, for providing us an opportunity to carry out this project work.

We find our acknowledgement incomplete without thanking **Dr. Ashok Shettar**, Principal BVBCET, Hubli-31 for the inspiration and co-operation.

**Pavankumar B L**

**Pradeep Channalli**

**Priyanka Patil**

**Vinay Pyati**

## ABSTRACT

We are familiar with the frequent security threats, tampering of answer scripts and delaying of results of the examinations. All these problems are caused by following the conventional method during the process of evaluation. This made us to think about improving the quality of the examination process. In this digital era, many conventional methods are digitized. This led to the development of the idea called as “**Smart Evaluation System**”. The product Smart Evaluation System is a software product which helps us in computerized assessment of the answer scripts. By ensuring security and converting the answer scripts into softcopy one can make sure that the papers cannot be tampered. The academic details of students are stored in the system which facilitates online results. In addition to the above mentioned solution, this system also provides convenience for the evaluators to assess the answer scripts anywhere. Hence the quote “**Evaluation- Anytime. Anywhere**”.
